

GIFTED 101

A presentation and discussion with **Courtney Dickinson**,
a leader in gifted education in Massachusetts

FREE | January 31 | 7:00-8:30 pm
Medford Public Library

Join parents and educators at the Medford Public Library for “Gifted 101,” a free presentation and discussion to address questions such as:

**What are some of the
different profiles of
gifted children?**

**What are some early
indicators that a child
is gifted?**

**How can parents and
educators meet the needs
of today’s gifted children?**

Dickinson is director and founder of Acera: The Massachusetts School for Science, Creativity, and Leadership. Founded in 2010, Acera is a non-profit STEM/STEAM school serving high-ability students in grades K-8. Its mission is to inspire children to become the problem solvers, innovators, creative thinkers, and leaders of tomorrow. It engages students in individualized, inquiry-based learning that is designed around their passions and aligned with their own abilities. The school’s approach enables children to think in broad new ways about the challenges they see and apply core capacities, such as systems thinking and perspective taking, to real-world problems.
